# Anti Slip Decking Strips

Dino Grip Anti-Slip Decking Strips are a prefabricated retrofitting solution, designed to tackle the problem of slippery surfaces. Our Anti-Slip Decking Strips are manufactured from FRP (Fibre Reinforced Plastic)/ GRP (Glass-fibre Reinforced Plastic) to provide an extremely tough and durable safety flooring solution. These products have been used successfully in the most testing environments.

Our Anti Slip Decking Strips have been designed for DIY projects and simply screw on to the existing timbers, through the pre-drilled holes, using stainless steel screws. All our strips have a feather edge (smooth, slightly curved) to ensure no clipping or tripping of feet.

Dino Grip Anti-Slip Decking Strips are a quick and easy way to improve safety on wood deck flooring - they create an instant Non-Slip surface, right over the top of your existing decking or surface.

## Stair Nosings

Dino Grip Stair Nosings are a prefabricated non-slip step edge with a highlighted nosing to provide an instant solution to slippery steps. Our Stair Nosings have been manufactured to provide an extremely tough and durable product.

Dino Grip Stair Nosings offer both a color differentiation and an anti-slip solution to any step edge and can be fitted to almost any step without creating a trip hazard. Dinogrip Stair Nosings are easy to install and are suitable for DIY installations and have been used in the most testing environments.

## Stair Treads

Dino Grip Stair Treads are the ultimate choice for dealing with potential slip hazards on steps. Once installed, stair safety is instantly improved!

Dino Grip Stair Treads are a prefabricated product, which provide full cover to the whole stair, with a contrasting colored nosing. They offer extreme slip resistance and can be installed on almost all types of stair substrates; including traditional steel checker plate, which are notoriously slippery when wet.

Our Stair Treads can also be used to over clad steps, which suffer from surface deterioration, such as concrete steps. These Stair Treads have been used successfully in many applications.
